

PROCESS INDUSTRY

The VE Group represents six healthy and experienced companies, each independently active on the industrial market. With a team of over 175 employees, we deliver innovative custom made solutions for the process industry with products like heat exchangers, filters, pressure vessels and reactors. Because the different companies contribute to one another in a wide range of fields, the synergy between them increases the added value of the various specialties. The synergy optimizes the realization of individual components and larger projects within the group and with a centralized responsibility. A strong, professional world-class supplier with a friendly and reliable face. From design to product, from delivery to installation and service:

One company, one quality, one team!

Facilities:

- Total capacity 180,000 man-hours
- 2 Production facilities: Rotterdam and Vlissingen
- Total Plot surface 23,000 m²

Why choose for VE Group?

- High return for your investment
- Reliable, High Quality, Dedicated project management
- In-house thermal & mechanical design & engineering
- Knowledge and experience Centre

EXTENSIVE KNOWLEDGE AND EXPERIENCE

SOLUTIONS FOR THE PROCESS INDUSTRY

Vermeer Eemhaven International B.V.

Vermeer Eemhaven International is a specialist in fabrication and repair of heat exchangers for the oil, gas and petrochemical industry since 1955. We design and manufacture shell & tube exchangers and pressure vessels in various (exotic) materials. Our productrange consists of the following devices: condensers, re-boilers, U-bundles, Helixchangers® and airfin coolers

Vermeer Process Technology B.V.

Vermeer Process is a specialist in the field of process filtration and is a member of the VE Group since 2004. As designer, trouble-shooter, manufacturer and supplier we can provide advice, design and the best product throughout the entire project. To us, efficient filtration means attention to filter efficiency, redress life and price-quality ratio.

Vermeer Thermex International B.V.

Vermeer Thermex International is a specialist in External process heating systems with 30 years of ample experience. VTI designs, engineers, manufactures and supplies the ThermEx Thermal Maintenance System for all kind of piping, vessels and tanks maintaining the required process temperature enabling melt-out requirements.

Vermeer Site Services B.V.

Vermeer Site Services has been active in the field of pipe and equipment construction in the (petro) chemical industry since 1993. As part of the VE Group, Vermeer Site Services specialises in the service and assembly of such equipment as heat exchangers.

Schelde Exotech B.V.

Schelde Exotech was founded in 1998, arisen from merging the following companies: AKF Goes, Schelde Boiler Division and Schelde MT-Products. With the specific knowledge of these three companies a wide range of customers has been established in the chemical and petrochemical industries, electrical power plants, uranium enrichment facilities and research institutes.

Vermeer India B.V.

Vermeer India is our sales office since 2009 for Heat Exchangers and Filter products. They are also our extended engineering company for all special projects. Our high educated professional team is able to handle all qualifications and requirements from customers all over the world.

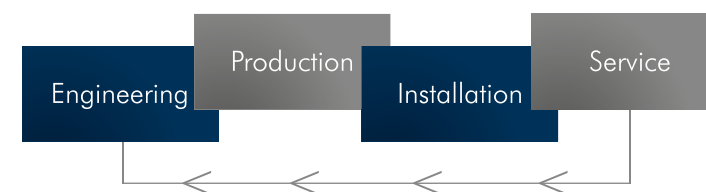

Oil & Gas
(Petro) Chemical
Food & Beverages
Water
Energy
Defence
Research Institutes

SYNERGY

Normal process

Process VE Group

THE ADVANTAGES OF CHAIN EFFICIENCY ARE

- Transfer of information
- Transfer of knowledge
- Informal fellowship between the various disciplines.
- Time

THE PRODUCTS

Based on our knowledge and experience we design, build and maintain various types of equipment for the processing industry. We do this using a choice of all available stainless steel materials as well as high nickel alloys and such exotic materials as titanium and zirconium. With our knowledge in the area of welding techniques and our experience in the petrochemical industry, we produce such high quality specialised products as:

Heat exchangers - Filters - Pressure vessels - Columns - Crystallizers - External process heating systems

VISION

The vision of the VE Group is to be an reliable partner for the industrial market in the field of process and energy technology. This comprehends all facets of the total process. From the client's challenge through the installation of the perfect product.
Innovation - engineering - production - assembly - repair - service.

MISSION

Knowledge

With more than 60 years of experience, the company has demonstrated its use of knowledge to design, manufacture and install state-of-the-art products.

We maintain all disciplines within one company

As total supplier, together with the client, the VE Group can produce a high qualified product.

We keep our commitments

Both internally and externally: a commitment is a commitment!

High level of training for our staff

We constantly work on improving processes

SPECIAL EQUIPMENT

- Automatic Tube-tube sheet orbital welding
- Automatic Multi-spindle drilling machine
- Automatic Cutting Machine
- Electron Beam Welding
- Internal Bore Welding
- Clad Welding
